PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in healthcare and operations analytics, specializing in transforming raw data into actionable insights. Proficient in SQL, Excel, Tableau, Power BI, and Python, with experience leveraging AI tools for data generation, analysis, and workflow optimization. Strong in data cleaning, visualization, and storytelling, with a track record of building end-to-end projects, including KPI development and interactive dashboards. Delivers a structured, business-focused approach to improving operational efficiency and enabling data- and AI-driven decision-making.

TECHNICAL SKILLS

Data Analysis Tools	Microsoft Excel (Advanced), Power BI, Tableau, Google Sheets, SPSS
Programming Languages	Python (Pandas, NumPy, Matplotlib, Seaborn), R, DAX, Java
Databases & SQL	MySQL, PostgreSQL, Microsoft SQL Server, BigQuery
Visualization Tools	Power BI, Tableau, Looker Studio, Matplotlib, Plotly
Other Tools	Git/GitHub, Jupyter Notebook, Microsoft Azure, Google Analytics, dbt

WORK EXPERIENCE

Insights and Operations Analyst | Introspect Consultancy

London, United Kingdom (Remote) • June 2025 – March 2026

- Developed automated event performance dashboards using Excel and Tableau, reducing manual reporting time and enabling real-time insights for event planning and operations teams.
- Cleaned and analyzed attendee, ticketing, and engagement data using SQL and Excel, identifying trends that improved event attendance and participant satisfaction.
- Collaborated with marketing and operations teams to segment audiences and optimize event campaigns, contributing to increased ticket sales and higher engagement rates.
- Wrote and optimized SQL queries to extract and transform data from multiple sources (ticketing platforms, CRM systems), improving reporting efficiency and supporting data-driven event planning decisions.

Customer Sales and Service Representative | Westman Communications Group

Brandon, Canada • December 2022 – November 2025

- Delivered customer support by handling inquiries related to billing, service plans, and technical issues, ensuring timely resolution and high customer satisfaction.
- Promoted and upsold telecommunications products and services based on customer needs, consistently contributing to sales targets and revenue growth.
- Managed customer accounts by updating records, processing service changes, and resolving complaints while maintaining accurate documentation in CRM systems.

DATA ANALYTICS PROJECTS

Project Title 1 - Telecommunications Customer Experience & Call Center Performance Analysis

Tools: SQL, Excel, Tableau, AI (for dataset generation), Medium

- **Brief description:** Generated a synthetic telecom dataset using AI and conducted a full analysis of call center performance, including wait times, call volumes, and service efficiency. Built dashboards to track KPIs and performance trends.
- **Key insight/result:** Identified key drivers of long wait times and underperforming call categories, enabling targeted operational improvements. Dashboard provided a centralized view of KPIs to support data-driven decision-making.

Link: [Medium Story](#)

Project Title 2 - Hospital Patient Flow & Wait Time Analysis

Tools: SQL (MySQL), Excel, Tableau, GitHub

- **Brief description:** Analyzed hospital admission and patient flow data to understand wait times, referral patterns, and operational bottlenecks. Cleaned and standardized raw data, including inconsistent date formats and categorical errors, to enable accurate analysis.
- **Key insight/result:** Identified peak admission hours and that “No Referral” cases had the highest volume, highlighting inefficiencies in intake processes. Discovered a relationship between longer wait times and lower patient satisfaction, informing process improvement opportunities.
- **Link:** [GitHub Repository](#)

Project Title 3 - Healthcare Cost & Length of Stay Analysis Dashboard

Tools: Excel, Tableau, GitHub

- **Brief description:** Built an end-to-end analysis of hospital billing data, focusing on cost drivers and patient length of stay across conditions, age groups, and insurance providers. Developed pivot tables and interactive dashboards to visualize KPIs.
- **Key insight/result:** Found that Diabetes contributed the highest total cost, while Asthma had the longest average length of stay. Analysis showed minimal variation across insurance providers but revealed patterns useful for resource planning and cost management.

EDUCATION

B.Sc. Computer Science (Minor - Mathematics)

Brandon University, Brandon, Canada • 2027

Relevant coursework: Statistics, Database Management, Research Methods, Operations Research, Data Structures and Algorithm, Software engineering

CERTIFICATIONS

- **Google Data Analytics Professional Certificate** — Google / Coursera, 2026
- **Data Analyst Certificate** — Analyst Builder, 2026
- **Google Project Management Professional Certificate** — Google / Coursera, 2023

TOOLS & TECHNOLOGIES

Power BI • Tableau • Excel (Advanced) • SQL • Python • R • Git • DBT • BigQuery • Google Analytics • Microsoft Azure • Looker Studio • SPSS • Medium (for data storytelling) • AI

AWARDS, LEADERSHIP & MEMBERSHIPS

- **Community/Leadership Role:** *Public Relations Officer, Umuigbo Brandon - Built and hosted a full stack website for the community (2024–Present)*
- **Volunteer/Mentorship:** *Data Mentor, Empower Her Community.*
